Re: Certified Engineering Geologist Occupational Analysis

Dear Certified Engineering Geologist:

An occupational analysis survey is now available to all Certified Engineering Geologists. You can use the following link to access the survey via Survey Monkey:

<https://www.surveymonkey.com/s/2MMV365>

Please note: If you received a separate email directly from Survey Monkey please use that link.

It is incredibly vital to your chosen profession that sufficient and appropriate licensees respond to this questionnaire so that the resulting examination test plan specifications truly and accurately reflect the respective practices as they occur in today's world.

The Certified Engineering Geologist occupational analysis questionnaire was developed through a collaborative effort between a group of Certified Engineering Geologists, the Board for Professional Engineers, Land Surveyors, and Geologists, and the Department of Consumer Affairs' Office of Professional Examination Services. Please complete the questionnaire based on your own practice within the last year.

Be sure to answer each questionnaire from the sole perspective of the appropriate level of certification as indicated by that questionnaire.

Individual responses will remain confidential. The summarized results from the questionnaire will help the Board to understand the current scope of Engineering Geology throughout the state and be used to develop new Engineering Geologist Examination test specifications beginning with the fall 2013.

Please note that the questionnaire must be completed by **Monday May 6, 2013.**

If you have any questions about this process, please contact Patty Smith, the Board's Geology Program Lead Analyst at (916) 263-1847 or by email at patty.smith@dca.ca.gov. Thank you, in advance, for support of our licensure program.

Sincerely,

A handwritten signature in cursive script, appearing to read "R. Moore".

Richard B. Moore, P.L.S.; Executive Officer
Board for Professional Engineers, Land Surveyors, and Geologists
