December 8, 2017

The California Board for Professional Engineers, Land Surveyors, and Geologists (BPELSG) is undertaking a comprehensive research project of the geotechnical engineering profession referred to as an Occupational Analysis. You are invited to participate in an online survey that will validate the tasks and knowledge that are important to the work performed by geotechnical engineering professionals as it applies to the definition of geotechnical engineering and authority to practice in California.

The results of the study will be used to update the California Geotechnical Engineering examination and will also provide BPELSG with valuable information regarding the work performed by geotechnical engineering professionals. The Occupational Analysis is completed every five to seven years and is the source for determining the content of the licensing examinations. This analysis is an essential step in keeping the geotechnical engineering examinations current and practice-related.

Your participation is critical to ensuring the success of the study. As part of this study, we need your assistance in completing an online survey. Please consider filling out the survey that takes approximately **30** minutes to complete and can be saved and completed in multiple sessions.

INSTRUCTIONS FOR PARTICIPATION:

<https://www.prometricsurvey.com/se/123C457B4254F062>

The following contact information is provided if you encounter any technical difficulties with completing the survey online or have questions regarding the survey content. Please be sure to identify the survey you are taking (California Geotechnical Engineering Occupational Analysis 2017). Email: julie.morby@prometric.com or Telephone: (801) 541-9738. You will receive a response within 24 hours, Monday through Friday (except holidays).

Your completed survey should be submitted by February 28, 2018 (11:59 PM PST).

Thank you in advance for your participation in this survey and ongoing support of the program.
